BULB GREASE

DESCRIPTION: The material covered by this specification is a non-petroleum, synthetic, high temperature, hydrophobic dielectric grease. BULB GREASE is formulated to stay put locking out the moisture which could lead to corrosion of components. BULB GREASE will not harm the rubber or plastic components.

APPLICATION Protects and seals out moisture when used on cars, trucks, and marine. where a good clean electrical connection is needed. Applying a thin film of BULB GREASE around the base of the bulb will lock moisture out and keep the bulb from becoming stuck or corroded.

Packaging BG-1 4 gram pouch

Properties	Physical Form	White Grease (gel)
	Specific Gravity, 60/60°F (16/16°C)	1.11
	Density, lb/gal	9.26
	NLGI, grade	2
	Flash Point, base oils (C.O.C., °F)	>400
	Operating temperature, °F	>600
